

## Personhood Amendment: House Bill # 490

13  
I have had two abortions, and my mother-in-law said I needed to abort my baby, as she did not want me to raise her grandchild I was carrying; as her son and I were not married yet, and because I had a daughter from my first marriage. Had I done so, I would not have my most wonderful and only son. I love my two children, and am grateful to have been blessed to raise them.

I murdered my first healthy baby by abortion, having been lied to by Planned Parenthood; telling me that the fetus and I only had a 50-50 chance to live if I chose to carry to term; which I learned later was medically absolutely false, and was completely unnecessary! Not only that, but the abortion was extremely painful. I woke in the middle of the operation in a clinic, with many people going in and out of the room with no privacy. I was feeling the scraping, screaming for them to give me something for the pain (of which I have never felt equaled in my life to this day), but to no avail, as they did nothing to ease my pain.

My second abortion was my third pregnancy. This pregnancy was a result of being raped. I was looking forward to raising this child too, for it was not the babies fault! But I began hemorrhaging at 15 weeks, hemorrhaging heavily for two weeks. I began running a high fever of 104, and felt I was going to die if I tried to carry the baby any-longer. So, I decided to go to the hospital to abort the baby, which I did.

Had I known before my abortions, that I would have to live with the anguish of knowing: these were little people I murdered and caused to suffer before death; or that my first abortion being my first pregnancy, would cause damage to my reproduction system, and endangers my possibility to 50% chance to carry any future pregnancy to term; let alone learning that all abortions greatly raise the chance of breast cancer; I would have died instead of killing my babies. I now know each of us will be held accountable one day for killing our own children in our wombs!

Abortion has never been legalized through the proper channels of legislature, and by the Law of God cannot be legalized; so it is still murder to kill the unborn children in the wombs.

I strongly support this bill, to protect the unborn, and to protect other women from suffering for bad choices of murdering their own children as I have done!

Respectfully, Lee Ann Bear
